

# MAUTIK BHARATBHAI PATEL

AI, Business Intelligence & Data Analytics Leader | Delivery Strategist | People Builder

Vadodara, Gujarat, India | +91 9426469119 | [mautikpatel@outlook.com](mailto:mautikpatel@outlook.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Organizations don't invest in analytics; they invest in better business decisions. For more than 12 years, I have partnered with executive stakeholders to bridge business strategy and technology execution by delivering scalable Business Intelligence, Data Analytics, and digital solutions that improve operational performance, strengthen governance, and enable executive decision-making. Today, I extend that leadership by designing and implementing Enterprise AI solutions, including Generative AI applications, Retrieval-Augmented Generation (RAG) platforms, and intelligent knowledge systems that improve organizational productivity, unlock organizational knowledge, and create measurable business value.

## CAREER HIGHLIGHTS

- Managed a \$4.5M enterprise analytics portfolio across 4 major clients by directing concurrent strategic delivery programs.
- Delivered 70+ BI, Data Analytics, and digital transformation initiatives with 99% on-time completion through project execution.
- Enabled data-driven decision-making by translating 3,000+ business requirements into scalable analytics solutions, executive dashboards, and KPI frameworks.
- Improved program productivity by 60% by leading Agile transformation, delivery governance, and cross-functional collaboration.
- Reduced requirement rework by 40% by strengthening stakeholder engagement, requirements governance, and Agile delivery.
- Enhanced reporting and database performance by 50-90% through modernization and optimization initiatives.
- Built high-performing analytics teams by mentoring 30+ professionals and driving continuous improvement.
- Earned 4 promotions and 15+ organizational awards for leadership, innovation, customer success, and execution excellence.

## CORE COMPETENCIES

Enterprise Portfolio & Program Management | Executive Stakeholder Management & Communication | Data & Analytics Strategy | Business Intelligence Governance | Digital Transformation Leadership | AI Product Management & AI Strategy | Product Roadmap Planning & Backlog Management | Agile/Scrum Delivery Leadership | Risk, Governance & Compliance Management | Cross-functional & Technical Team Leadership | Decision Intelligence & KPI Frameworks | Requirements Engineering & Business Analysis

## PROFESSIONAL EXPERIENCE

Principal Systems Analyst

January 2017 - Present

Altera Digital Health

Vadodara, India

- Owned a \$4.5M enterprise analytics portfolio across 4 major clients, delivering 70+ Business Intelligence, Data Analytics, modernization, and digital transformation initiatives with a 99% on-time completion record through portfolio governance, proactive risk management, and executive stakeholder alignment.
- Achieved 95% roadmap execution by defining organization-wide data analytics strategy and roadmaps, partnering with VP/Director stakeholders to prioritize investments, standardize KPI frameworks, establish reporting oversight, and align analytics initiatives with organizational objectives.
- Influenced 25+ executive-level business decisions by transforming 3,000+ business requirements into scalable analytics products, executive dashboards, KPI frameworks, and decision-support capabilities that improved operational visibility and accelerated strategic planning.
- Accelerated delivery productivity by 60% and milestone adherence by 25% by directing large-scale Agile execution across discovery, backlog prioritization, sprint planning, release governance, and cross-functional execution.
- Reduced manual reporting errors by 40% and accelerated executive report turnaround from minutes to seconds by architecting and standardizing BI platforms using Power BI, SSRS, SSAS, SQL Server, and semantic reporting standards.
- Enhanced reporting and database performance by 50-90% by leading data platform modernization through ETL optimization, reporting architecture, SQL performance tuning, and deployment automation, enabling faster business insights.
- Minimized delivery delays by 20-30% and requirement rework by 40% through governance frameworks covering requirements management, RAID, SLA, release management, audit readiness, and ISO 9001:2015 compliance.
- Built and led high-performing analytics teams by mentoring 30+ professionals through coaching, technical leadership, and continuous improvement.
- Delivered 15+ platform upgrades and releases with 100% production success and zero major rollbacks through structured release governance, comprehensive testing, and deployment planning.
- Strengthened application performance by 30-40% by leading resolution of 1,500+ production issues and performance bottlenecks through root cause analysis and platform optimization.
- Designed and implemented an AI-powered real-time monitoring chatbot that reduced manual alert triage by 50-60%, accelerating operational response and showcasing practical Generative AI adoption.

- Achieved 100% on-time delivery across project milestones by delivering WPF/WCF applications for 2 US-based insurance and financial services clients, translating business requirements into scalable, production-ready solutions.
- Improved application performance by 40% by engineering 50+ SQL stored procedures and corporate financial reporting solutions supporting Profit & Loss (P&L), Balance Sheet, and operational reporting through optimized database design.

ENTERPRISE AI & ANALYTICS PROJECTS

- Enterprise AI Knowledge Assistant | *Private Enterprise Retrieval-Augmented Generation (RAG) Platform* | [GitHub](#)
- Developed a private Enterprise AI Knowledge Assistant transforming fragmented organizational documents into an intelligent conversational knowledge platform, enabling secure, AI-powered access to company information without cloud dependency.
  - Architected a production-ready RAG solution using Python, Streamlit, Ollama, LangChain, ChromaDB, and Sentence Transformers, supporting 6+ organizational document formats, semantic search, vector embeddings, and context-aware AI responses.
  - Delivered a scalable modular platform comprising 8+ AI service modules, enterprise document processing pipelines, and fully local LLM inference, demonstrating practical implementation of secure Enterprise AI for knowledge management.

- Enterprise AI Product Management Toolkit | *End-to-End PM Documentation Toolkit for an AI Product* | [GitHub](#)
- Built a complete project documentation toolkit covering all 9 phases of project lifecycle, from initiation and requirements through architecture, planning, governance, testing, execution, go-live, and closure, modeled on the real lifecycle of a large-scale RAG-based AI product.
  - Authored 15+ formal documents including a Project Charter, BRD, FRD, PRD, Technical Design Document, RACI Matrix, RAID Log, AI Risk Evaluation and Safety Case, Test Plan with UAT Sign-Off, and Launch Readiness Review.
  - Standardized governance and risk practices for AI program execution, including infrastructure and capacity planning, organizational readiness and SLA definitions, and responsible AI risk assessment, to help reduce execution variability for stakeholders and sponsors.

- Executive Analytics Dashboard | Executive Business Intelligence & Decision Support Platform | [GitHub](#)
- Designed an executive healthcare analytics solution transforming operational, financial, clinical, and patient experience data into actionable business intelligence for leadership teams.
  - Built a scalable Power BI solution featuring 5 executive dashboards, 47+ enterprise KPIs, 100+ DAX measures, and a star-schema semantic model supporting organization-wide reporting.
  - Implemented enterprise reporting standards, KPI governance, and executive visualization best practices to produce a production-ready analytics platform.

EDUCATION

Master of Computer Applications (MCA)

Charotar University of Science and Technology

July 2011 - December 2014

Anand, India

CERTIFICATIONS

PRINCE2® | CSM® | ITIL® 4 | Snowflake | Google: Generative AI | Microsoft Certified Professional (MCP®)

ADDITIONAL TECHNICAL SKILLS

- Product, Project & Delivery: Product Strategy | Product Road mapping | Business Analysis | Requirements Engineering | User Story | Backlog Prioritization | Agile | SDLC | Release Management | Change Management | Risk Management | Stakeholder Management | Portfolio Delivery
- Artificial Intelligence: Enterprise AI | Generative AI | Retrieval-Augmented Generation (RAG) | Large Language Models (LLMs) | AI Agents | Prompt Engineering | LangChain | Ollama | ChromaDB | Sentence Transformers | Vector Databases | Semantic Search | AI Knowledge Management
- Business Intelligence & Data Analytics: Power BI | Microsoft Fabric | DAX | Power Query | SSRS | SSAS | Tableau | SQL Server | Advanced SQL (Performance Tuning & Query Optimization) | Executive Dashboards | KPI Frameworks | Data Visualization | Semantic Data Modeling | Data Warehousing | ETL/ELT (SSIS, Azure Data Factory)
- Programming & Cloud: Python | Pandas | PySpark | C# | .NET | WPF | REST APIs | Web Services | Microsoft Azure | Snowflake | Databricks | Azure AI Foundry | Git | GitHub | AWS (Exposure) | Google Cloud Platform (Exposure)
- Platforms: JIRA | Microsoft Project | Smartsheet | ServiceNow | SharePoint
- Domain Expertise: Healthcare | Insurance | Accounting & Financial Systems | Education
- Healthcare Standards: Electronic Health Records (EHR) | Electronic Medical Records (EMR) | Clinical Workflows (Ambulatory & Acute Care) | HL7 | FHIR | CCDA | HIPAA | CMS | EDI | Meaningful Use | Medical Logic Modules (MLM)
