

MAUTIK BHARATBHAI PATEL

Product & Technology Delivery Leader | Product Management | AI, Data & Analytics | People Builder

Vadodara, Gujarat, India | +91 9426469119 | mautikpatel@outlook.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Organizations don't invest in technology; they invest in better customer and business decisions. For more than **12 years**, I have partnered with **executive stakeholders** to bridge **business strategy and technology execution**, applying **product management and Agile/Scrum principles** to define product vision, roadmaps, requirements, and prioritized backlogs for scalable **digital, data, and technology solutions** that improve operational performance, strengthen governance, and enable informed decision-making. I extend that leadership through **AI initiatives**, including **Generative AI, Retrieval-Augmented Generation (RAG), LLMs, and AI-powered knowledge systems**, with a focus on practical adoption, governance, and measurable business value.

CAREER HIGHLIGHTS

- Managed a **\$4.5M** enterprise portfolio across **4** major clients, directing concurrent strategic initiatives and aligning priorities, roadmaps, delivery, and stakeholder outcomes.
- Delivered **70+** Data Analytics, and digital transformation initiatives with 99% on-time completion through product and delivery execution.
- Enabled data-driven decision-making by translating **3,000+** business requirements into epics, features, user stories, scalable analytics products, executive dashboards, and KPI frameworks.
- Increased delivery productivity by **60%** through Agile/Kanban transformation, delivery governance, and cross-functional collaboration.
- Reduced requirement rework by **40%** by strengthening stakeholder engagement, requirements governance, and Agile delivery practices.
- Enhanced system and solution performance by **50-90%** through modernization and optimization initiatives.
- Built high-performing teams by mentoring **30+** professionals and driving continuous improvement and knowledge sharing.
- Earned **4** promotions and **15+** organizational awards for leadership, innovation, customer success, and execution excellence.

CORE COMPETENCIES

Product Management & Strategy | Product Vision, Roadmaps & Backlog Management | Product Discovery & Customer Needs | Requirements Engineering, Epics, Features & User Stories | Agile/Scrum & Kanban Delivery Leadership | Enterprise Portfolio & Program Management | Executive Stakeholder Management & Influence | Cross-functional & Technical Team Leadership | Business Analysis | AI Strategy & Transformation | Risk, Governance & Compliance Management | Business Intelligence Governance | Decision Intelligence & KPI Frameworks

PROFESSIONAL EXPERIENCE

Principal Systems Analyst

January 2017 - Present

Altera Digital Health

Vadodara, India

- Achieved **99%** on-time delivery across a **\$4.5M** portfolio spanning **4** major clients and **70+** AI, BI, Data Analytics, digital transformation, and .NET initiatives, by owning product strategy, roadmap planning, prioritization, and delivery through portfolio governance, executive alignment, and proactive risk management.
- Achieved **95%** roadmap execution by shaping product vision and strategic direction and partnering with VP/Director stakeholders, business, operations, and technology teams to translate complex business problems and organizational objectives into prioritized roadmaps, problem statements, KPI frameworks, and measurable product outcomes.
- Improved delivery productivity by **60%** and milestone adherence by **25%** by leading end-to-end product discovery, backlog prioritization and refinement, sprint planning, Agile/Scrum/Kanban execution, dependency management, and release governance.
- Strengthened product-to-engineering alignment by serving as a **primary point of contact** between business stakeholders and technology teams, aligning product intent, technical feasibility, delivery priorities, trade-offs, dependencies, and quality outcomes across business, engineering, QA, data, and operations throughout the product lifecycle and SDLC.
- Influenced **25+** executive-level business decisions by translating **3,000+** requirements into product capabilities, epics, features, user stories, acceptance criteria, and technical requirements, aligning customer and business needs with engineering execution and measurable outcomes.
- Reduced manual reporting errors by **40%** and accelerated executive reporting turnaround from minutes to seconds by defining and standardizing BI product capabilities, semantic models, KPI frameworks, and reporting standards across Power BI, SSRS, SSAS, and SQL.
- Achieved **50-90%** performance improvements across reporting and data platforms by leading data-platform modernization, ETL optimization, reporting architecture improvements, SQL performance tuning, and deployment automation, enabling faster business insights and improved platform efficiency.
- Reduced delivery delays by **20-30%** and requirement rework by **40%** by strengthening product and requirements governance, stakeholder validation, RAID management, dependency tracking, SLA governance, release management, audit and operational readiness, **ISO 9001:2015** compliance, and continuous improvement.
- Achieved **100%** production success across **15+** product upgrades and releases with zero major rollbacks by leading planning, requirements, testing, deployment, production readiness, and release governance in partnership with engineering and QA.
- Improved application and platform stability by **30-40%** by leading resolution of **1,500+** production issues and performance bottlenecks through root-cause analysis, corrective actions, production operations, and platform optimization.
- Reduced manual alert triage by **50-60%** by identifying a high-impact operational inefficiency and leading the product design, development, validation, and production adoption of a **GenAI-powered monitoring chatbot**, enabling teams to conversationally investigate alerts, retrieve relevant operational context, and accelerate incident analysis and response.
- Built high-performing technology teams by hiring, mentoring, and coaching **30+** professionals, achieving **70%+** retention while strengthening technical capability, product delivery discipline, knowledge sharing, and continuous improvement.

Software Engineer

June 2014 - January 2017

I-Engineering, Inc.

Ahmedabad, India

- Achieved **100%** on-time delivery across project milestones by delivering WPF/WCF applications for **2** US-based **insurance and financial services clients**, translating business requirements into scalable, production-ready solutions.
- Improved application performance by 40% by engineering 50+ SQL stored procedures and corporate financial reporting solutions supporting Profit & Loss (P&L), Balance Sheet, and operational reporting through optimized database design.

ENTERPRISE AI & ANALYTICS PROJECTS

FraudShield AI | AI-Powered Payment Fraud Detection & Investigation Platform | [GitHub](#)

- Designed an AI-powered payment fraud detection product combining transaction risk scoring, configurable fraud rules, and explainable decisioning to support real-time payment risk assessment and investigation workflows.
- Defined **product vision, functional requirements, risk-based decision workflows, scoring thresholds, product roadmap, and technical architecture** across transaction processing, fraud detection, review, blocking, and investigation capabilities.
- Built a production-style API platform using **Python, FastAPI, PostgreSQL, and machine learning**, supporting transaction processing, risk scoring, fraud decisions, investigation data, and operational analytics, with a roadmap toward **AI-assisted fraud investigation and analyst productivity**.

Enterprise AI Knowledge Assistant | Private Enterprise Retrieval-Augmented Generation (RAG) Platform | [GitHub](#)

- Developed a private Enterprise AI Knowledge Assistant transforming fragmented organizational documents into an intelligent conversational knowledge platform, enabling secure, AI-powered access to company information without cloud dependency.
- Architected a production-ready **RAG solution using Python, Streamlit, Ollama, LangChain, ChromaDB**, and Sentence Transformers, supporting **6+** organizational document formats, semantic search, vector embeddings, and context-aware AI responses.
- Delivered a scalable modular platform comprising **8+** AI service modules, enterprise document processing pipelines, and fully local LLM inference, demonstrating practical implementation of secure Enterprise AI for knowledge management.

Enterprise AI Product Management Toolkit | End-to-End PM Documentation Toolkit for an AI Product | [GitHub](#)

- Built a complete project documentation toolkit covering all **9** phases of project lifecycle, from initiation and requirements through architecture, planning, governance, testing, execution, go-live, and closure, modeled on the real lifecycle of a large-scale RAG-based AI product.
- Authored **15+** formal documents including a Project Charter, BRD, FRD, PRD, Technical Design Document, RACI Matrix, RAID Log, AI Risk Evaluation and Safety Case, Test Plan with UAT Sign-Off, and Launch Readiness Review.
- Standardized governance and risk practices for AI program execution, including infrastructure and capacity planning, organizational readiness and SLA definitions, and responsible AI risk assessment, to **help reduce execution variability** for stakeholders and sponsors.

Executive Analytics Dashboard | Executive Business Intelligence & Decision Support Platform | [GitHub](#)

- Designed an executive healthcare analytics solution transforming operational, financial, clinical, and patient experience data into actionable business intelligence for leadership teams.
- Built a scalable Power BI solution featuring **5 executive dashboards, 47+ enterprise KPIs, 100+ DAX measures**, and a star-schema semantic model supporting organization-wide reporting.
- Implemented enterprise reporting standards, KPI governance, and executive visualization best practices to produce a production-ready analytics platform.

EDUCATION

Master of Computer Applications (MCA)

Charotar University of Science and Technology

July 2011 - December 2014

Anand, India

CERTIFICATIONS

Microsoft Certified: AI Transformation Leader (AB-731) | PRINCE2® | CSM® | ITIL® 4 | Snowflake | Google: Generative AI | Microsoft Certified Professional (MCP®)

ADDITIONAL TECHNICAL SKILLS

- Product, Project & Delivery:** Product Strategy | Product Road mapping | Business Analysis | Requirements Engineering | User Stories & Acceptance Criteria | Backlog Prioritization & Refinement | Agile (Scrum & Kanban) | SDLC | Release Management | Change Management | Risk Management | Stakeholder Management | Portfolio Delivery
- Artificial Intelligence:** Enterprise AI | Generative AI | Retrieval-Augmented Generation (RAG) | Large Language Models (LLMs) | LLM APIs | AI Agents | Prompt Engineering | LangChain | Ollama | ChromaDB | Sentence Transformers | Vector Databases | Semantic Search | AI Knowledge Management
- Business Intelligence & Data Analytics:** Power BI | Microsoft Fabric | DAX | Power Query | SSRS | SSAS | Tableau | SQL Server | Advanced SQL (Performance Tuning & Query Optimization) | Executive Dashboards | KPI Frameworks | Data Visualization | Semantic Data Modeling | Data Warehousing | ETL/ELT (SSIS, Azure Data Factory)
- Programming & Cloud:** Python | Pandas | PySpark | C# | .NET | WPF | REST APIs | Microservices | Web Services | Microsoft Azure | Snowflake | Databricks | Azure AI Foundry | Git | GitHub | AWS (Exposure) | Google Cloud Platform (Exposure)
- Platforms:** JIRA | Confluence | Microsoft Project | Smartsheet | ServiceNow | SharePoint
- Domain Expertise:** Healthcare | Insurance | Accounting & Financial Systems | Education
- Healthcare Standards:** Electronic Health Records (EHR) | Electronic Medical Records (EMR) | Clinical Workflows (Ambulatory & Acute Care) | HL7 | FHIR | CCDA | HIPAA | CMS | EDI | Meaningful Use | Medical Logic Modules (MLM)
- Payments & Fraud:** Payment Transactions | Transaction Processing | BINs | Transaction Risk Assessment | Fraud Detection & Monitoring | Merchant Risk | Payment Workflows & Processes | Onboarding Workflows
